***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on June 15, 2006 has been entered.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 18 recites the limitation "said gear rack on said carriage" in line 4. There is insufficient antecedent basis for this limitation in the claim. It appears this claim should depend from claim 17 and not claim 15, but as that is not clear the claim can not be treated on the merits at this time. Clarification is required.

***Claim Rejections - 35 USC § 102***

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 28 is rejected under 35 U.S.C. 102(b) as being anticipated by O'Neil et al.  
O'Neil et al. US 4,812,629 discloses a media storage system comprising:

a lift system with at least one guide track (42) along a first displacement path;  
a carriage (40) having a transfer shaft (46), said transfer shaft aligned along a second displacement path;

Art Unit: 3652

said transfer shaft operatively associated with said first guide shaft to move said carriage along said first displacement path;

a picker (35) slidably mounted on said transfer shaft for movement through said first and second displacement paths;

a drive motor mounted on said picker for moving it through said second displacement path.

***Response to Amendment***

The amendments to the claims filed on June 15, 2006 have been entered into the record.

***Allowable Subject Matter***

Claims 1-17 and 19-27 are allowed. Claims 1 and 25 have limitations dealing with the picker sliding on the drive member for moving the carriage in a first displacement path, which is not taught by the closest prior art of O'Neil et al.

Regarding claim 12 O'Neil does not teach or suggest that the transfer shaft rotatably engage the guide track to move the carriage along the first displacement path.

Claim 29 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The closest prior art of O'Neil does not teach or suggest using zero pitch threads on the transfer shaft.

The prior art made of record and not relied upon, but considered pertinent to applicant's disclosure is: Lee 1996, Luffel et al. 2004, Hext et al. 2006.
